Education

- **Kalinga Institute of Industrial Technology** 2021 – 2025
  B.Tech in Computer Science; CGPA: 9.5 *Bhubaneswar, India*

Skills Summary

- **Languages & Frameworks**: Java, JavaScript, React, C++, C#, Python, Angular, HTML/CSS, .NET Web API 2.0, NestJS, .NET Framework, REST API, TypeScript, SQL, MVC, Entity Framework, NUnit
- **Databases & Tools**: MySQL, PostgreSQL, MongoDB, SQL Server, Redis
- **Cloud & DevOps**: Azure, AWS, Docker, CI/CD, YAML
- **Developer Tools**: Git, VS Code, IntelliJ, Postman, Jira, Confluence, Visual Studio
- **Concepts**: Data Structures & Algorithms, Object-Oriented Programming (OOP), Microservices Architecture, Agile Methodology, Event-Driven Systems, SOLID Principles, ORM, Design Patterns, Debugging, Third-Party Integrations

Experience

- **Associate SDE Intern** March 2025 – Present
  Skill IQ *Bengaluru, India*
  - Architected and implemented scalable backend systems by translating business requirements into robust data models, choosing PostgreSQL or MongoDB based on data patterns, and enhancing performance with materialized views.
  - Built high-performance RESTful APIs and microservices using NestJS, integrating WebSocket modules over HTTP/2 to enable real-time, bidirectional communication.
  - Streamlined CI/CD processes by writing declarative Azure Pipelines (YAML) to automate build, test, and deployment stages; containerized applications with Docker and reinforced production stability through structured logging, monitoring, and full end-to-end testing.
- **Software Development Intern** June 2024 – December 2024
  TVS Motor Company *Bengaluru, India*
  - Led migration from legacy ASP.NET Web Forms to a modern Angular + .NET Web API 2.0 stack, significantly enhancing application modularity and performance.
  - Developed and optimized 12+ RESTful APIs using ADO.NET and Angular, reducing front-end to back-end communication latency by 30%.
  - Addressed functional, load, and regression testing issues tracked in Jira; contributed actively to Agile ceremonies, including sprint planning and daily stand-ups.

Projects

- **Full-Stack AI-Integrated LMS Project** Intelligent LMS & Assessment System for Sales Teams
  SkillIQ
  - Built a custom LMS for a sales client to manage role-based training, dynamic quizzes, and AI-generated follow-up interview questions using OpenAI Playground; integrated PDF/video content and automated evaluation logic.
  - Gathered business requirements and designed the full backend architecture—chose PostgreSQL for relational data (users, scores, quizzes) and MongoDB for flexible content storage (courses, materials); implemented analytics dashboards for performance insights.
  - Developed and tested all APIs and database schemas from scratch, handled containerization, cluster setup, and optimization for deployment on staging and production environments.
- **Backend + Payment Integration Project** Payment Gateway Integration with Tiered Plans
  SkillIQ
  - Integrated Razorpay payment gateway supporting three subscription tiers—Starter, Premium, and Enterprise—with varying interview limits and AI proctoring levels.
  - Developed plan-based controls enforcing interview quotas and proctoring features, enabling dynamic subscription management and seamless user experience.
- **Full-Stack Development Project** Dealership Management System (DMS)
  TVS Motor Company
  - Built and deployed 10 high-traffic DMS screens (8 in production) using Angular and .NET Web API 2.0, supporting 5,000 dealership queries daily.
  - Reduced form submission errors by 70% via backend validation and master-data lookup from SSMS stored procedures.
  - Automated API testing using Postman, enabling 30% faster regression cycles during QA.

Accomplishments and Certifications (Link)

- **Certifications**: Microsoft Certified Azure AI Engineer Associate, Cisco CCNA, ServiceNow CAD, HackerRank Problem Solving
- **Achievements**: Airbus Aerothon 6.0 (Top 10), Published in Scrivener Journal, CISCO Ideathon 2024 Finalist, Codathon 2023 Winner - KIIT
